

PORTABLE ACTUATOR UNITS

- Are you operating your valves efficiently?
- Do you need to save time and money?
- Do you need to operate in an emergency?
- Do you need to reduce operator fatigue & injuries?

Varley Hydraulics engineers have developed a portable unit for many applications including operation of valves, penstocks and lock gates in remote locations, or operation of complete hydraulic systems during power, or equipment failure.

The drive is hydraulic, so any mechanical drive and gearbox problems are eliminated.

Types of unit

- Portable wheeled unit
- Trailer mounted unit with road going lights brakes and tow hitch
- Skid mounted unit for rough terrain and civil applications
- Bespoke design; High Torque/Slow Speed

Lightweight Low duty unit

3kW Petrol unit

5.5kW Electric 'Stainless Steel' unit

PORTABLE ACTUATOR UNITS

8 kW Diesel Road going unit

Easy to operate controls

Variable torque settings with both open & close Torque Range adjustments

Drive Pillar connection designed to suit all applications

PORTABLE ACTUATOR UNITS

Unit Options available

- Electric 110 volts, 240 volts, 400 volts single & 3 Phase
- 4 Stroke Lightweight Petrol Engine
- Diesel
- Hazardous area applications

Unit Capacity & Application

- All applications catered for. Please consult our technical department for a solution to your valve operating problems.
- Site visits for demonstrations available.
